

For Immediate Release

EZQUEST SHIPS ITS THUNDER PRO JBOD TRIPLE INTERFACE STORAGE SOLUTION

The Thunder Pro JBOD Gives Users Two Drives In A Single Configuration For A Range Of Uses With Both Video And Audio Creation In Mind.

EZQUEST, INC., Anaheim, CA - January 21, 2010 - EZQuest introduces a JBOD (Just A Bunch of Drives) version of its Thunder Pro Triple Interface storage solution. The Thunder Pro JBOD Triple Interface offers the flexibility of two Hard Drives, two Firewire 800 ports, one USB 2.0 port and one EZport Firewire 400 front-access port (for quick connect/disconnect), a custom bridge-board utilizing the latest Oxford chipset, and uses high performance 7200 RPM SATA II drives with up to 16mb cache buffers.

The Thunder Pro JBOD Triple Interface drive delivers exceptional performance and was designed with professional audio and video users in mind. It supports all DAW editing programs, multi-stream video playback with real time effects and audio support, offers a smart on/off power switch in front, which automatically turns the drive on/off when the drive is plugged in/unplugged and a MegLev ultra quiet Smart Fan and thermostat to regulate drive temperature, with a warning buzzer for overheating or fan failure notification.

“The Thunder Pro JBOD is perfect for the recording studio by allowing the user to allocate tracks over two hard drives in the same enclosure allowing music producers and artists the freedom to concentrate on creativity and not the number of tracks they can use due to space and speed limitations” said Ebrahim Zmehr, President of EZQuest. “Video editors will take pleasure in the ability to edit and drag and drop back-ups on the second disk all the while feeling confident the data is safe”.

The Thunder Pro JBOD ships in a 4TB configuration and is priced at \$529.00
