

For Immediate Release

EZQUEST INC. INCREASES THE CAPACITY OF ITS THUNDER RAID BY OVER 30%

The Thunder RAID Now Offers Capacities of up to 8TBs While Still Delivering Transfers Speeds of Over 230MB/s in RAID 5

Anaheim, CA, February 4, 2010 - Today EZQuest Inc. (www.ezq.com) announced its Thunder RAID 8TB eSATA RAID for digital content creation applications. When used with the EZQuest 4 Port eSATA II PCI Express Card the Thunder RAID can achieve transfer speeds of over 230MB/s in RAID level 5. The performance the Thunder RAID offers sufficient speed to edit 10-bit uncompressed HD video or play back up to six 8-bit video streams, all in a compact form factor.

The Thunder RAID offers a 3Gbit eSATA interface in a 4 bay, hot-swappable / hot-pluggable desktop form factor, with up to 8TB of storage and can be configured in RAID levels 0,1,3,5,10, JBOD with its built-in RAID controller that allows full online RAID migration. The Thunder RAID sports a built-in handle for easy transportation as well as a USB 2.0 connection for use with systems where eSATA is not available and allows for remote GUI management in addition to its built-in push button display for configuration and status.

“The Thunder RAID will now hold over 15 hours of uncompressed HD in a RAID 0 configuration ” said Ebrahim Zmehrri, President/CEO of EZQuest. “And with 230MB/s transfer rates configured in a RAID 5, the Thunder RAID delivers both speed and fault tolerance required by content professionals.”

The Thunder RAID is shipping now in configurations up to 8TB and comes with an optional EZQuest 4 port eSATA II PCI Express card. The Thunder RAID MSRP starts at \$1,289 for the 4TB unit and \$1,799 for the new 8TB configuration.

About EZQuest Inc.

EZQuest Inc. was founded in 1994 with the goal of developing and manufacturing superb storage solutions for professional digital content creation applications, while providing the highest level of customer service & product quality. Since that time, EZQuest has emerged as a leader in the cutting edge development of Raid, Firewire, USB, eSATA and SCSI technologies designed for Audio-Video professionals that demand dependable equipment that lasts for years.
