

# Mini DisplayPort/Thunderbolt™ to HDMI Cable

6-Foot (1.8-meter) Cable with Anodized Aluminum Sleeves

- Connect your Mac to watch and listen to your favorite media in full HD 1080P and 3D with Digital Sound on your TV
- Minimizes EM interference with anodized aluminum sleeves on each end of the cable
- Extend / Mirror Your Desktop to any HDMI Enabled Display
- Fully Compatible with Mini DisplayPort and Thunderbolt™ Port
- 3D and HDMI 1.4a Compliance
- Compact design without taking any space from your other ports
- Single Cable Solution

**Mini DisplayPort to HDMI 6-foot Cable** can seamlessly connect Mini DisplayPort or Thunderbolt™ based Macs to any HDMI display. Our Mini DisplayPort/Thunderbolt™ to HDMI cable supports full HD output in 1080p with audio on most of today's MacBooks, MacBook Pro, MacBook Air, iMac, Mac mini or Mac Pro computers. You can easily watch or stream a movie or your personal video from your Mac to your HDTV.

## Fully Compatible with Thunderbolt™ Port

Regardless if you have an existing Mac with Mini DisplayPort or if you have the latest MacBook Pro, we have you covered. The Thunderbolt™ Port is fully compatible with our cable.

## Extend/Mirror Your Desktop

Mini DisplayPort/Thunderbolt™ to HDMI cable will let you extend or mirror your Mac's desktop to any HDMI display. Don't feel left behind because your Mac doesn't come equipped with HDMI. Our Adapter will solve your HDMI connectivity needs.

## All in one solution

This sleek cable design does come with anodized aluminum casing on both ends to minimize EM interference. This cable combines the video and audio pass-through into one simple solution. The audio and video are drawn from the Mini DisplayPort/Thunderbolt™, which eliminates cable clutter.

The single 6-foot (1.8m) long HDMI cable solution provides flexibility in extending your desktop content from anywhere.

## Specification:
