

USB-C Dual HDMI Multimedia Hub Adapter 5 Ports with Power Delivery 3.0

Dual HDMI 4K (one 60Hz, one 30Hz), 100 Watts USB-C Power Delivery 3.0 (FRS), and (2) USB 3.0 Ports with BC 1.2 (5in2)

- Operate dual HDMI 4K external displays (one 60Hz, one 30Hz) to create extended or mirror mode with HDCP enabled
- Latest USB-C Power Delivery version 3.0 with pass-thru charging up to 100 watts
- USB-C PD 3.0 Fast Role Swap helps to prevent data loss and keeps the 2nd and 3rd monitors ON if the USB-C power cable is disconnected from the hub while your MacBook display is open
- Two 5Gbps USB 3.0 ports with BC 1.2 capability
- Designed for Apple MacBook Pro or Air with two USB-C ports
- Minimizes EM interference with precision engineered anodized aluminum design
- Due to Apple M1 limitation on MacBook Pro 13" & Air 2020, you can only use one extended external display

Stream, Connect, and Charge

The EZQuest USB-C Dual HDMI Multimedia Hub Adapter 5 ports connects your MacBook USB-C ports to a dual HDMI hub so you can extend your screen to dual displays to create more efficient work flow while also connecting up to two standard USB 3.0 devices. This hub utilizes the latest Power Delivery version 3.0 with pass-thru charging up to 100 watts (20V/5A) for quickest and safest charging. You can charge your iOS devices and access your standard USB devices at the same time.

Efficient Work Flow with Dual HDMI Extended Mode

Create up to three extended mode displays on MacBooks with Intel processor and expand your work throughout these displays so you can work faster and more efficiently. Due to Apple M1 limitation on MacBook Pro 13" & Air 2020, you can only use one extended external display. Mirror your MacBook display to Dual HDMI displays in up to 1080p at 30Hz or UHD (3840x2160) at 60Hz on one and 30Hz on the 2nd one. Simply connect the adapter to the two USB-C ports on your MacBook and then to your display, TV or projector via an HDMI cable (sold separately).

Latest Power Delivery 3.0 with Fast Role Swap

Our USB-C hub features the latest USB-C Power Delivery version 3.0 with pass-thru charging up to 100 watts. It also utilizes the USB PD 3.0 Fast Role Swap technology which helps to prevent data loss and keep the 2nd and 3rd monitor ON if the USB-C power cable is disconnected from the hub while your MacBook display is open.

Stay Connected, Charged, Synced and Transfer Data

Use the standard USB 3.0 ports to connect devices such as your flash drives, camera, external hard drives or a USB cable for syncing other devices. Use the USB 3.0 ports with BC1.2 for charging your iPhone, iPod and more. The huge variety of portable devices with differences in USB ports, and complicated nature of rechargeable batteries, the USB Battery Charging (BC) version 1.2 is a critical standard for establishing the proper way to charge a battery from a USB port. Both of the USB 3.0 ports are equipped with BC1.2 to charge your devices with peace of mind. EZQuest USB-C Dual Multimedia Hub Adapter 5 ports will allow you to take full advantage of your Mac or any laptops that are equipped with USB-C ports.

Specification:

- Part Number: X40225
- UPC Code: 694307402256
- Input: USB-C / USB Type-C
- 1 X HDMI 4K 60Hz
- 1 X HDMI 4K 30Hz
- 1 X 100 Watts USB-C with Power Delivery 3.0
- 2 X 5Gbps USB 3.0 with BC1.2 ports (Charging output of 7.5 Watts (5V1.5-A) for each port)
- Thunderbolt™ 3/4 Compatible
- Dimension: L 97mm X W 39mm X H 11mm
- Weight: 2 oz
- One (1) year limited warranty

Compatibility:

- Intel Based Mac's with 2 USB-C Ports
- M1 Based MacBook Pro 13" and Air 2020*
- *Due to Apple M1 limitation on MacBook Pro 13" & Air 2020, you can only use one extended external display
