The latest EZQuest High Speed HDMI 4K 60Hz cable is based on HDMI® Specification 2.0 which supports video resolutions and refresh rates up to 4K. Static HDR formats are also supported, and bandwidth up to 18Gbps. Our cable features exceptionally low EMI (electro-magnetic interference) which reduces interference with nearby wireless devices.

High Speed HDMI 2.0 Cable

Standard HDMI 2.0: 18Gbps, 3D, 4K@60Hz, 32 audio channels, backward compatible with HDMI 1.4, HDMI 1.0

Maximize Your Visual Experience 4K 60Hz

Static HDR

This feature uses a single image descriptor in metadata that is applied to every scene and every frame of the whole movie.

Audio Return Channel

ARC is an HDMI 2.0 feature which ensures full compatibility between audio devices and upcoming HDMI 2.0 products. ARC simplifies connectivity, provides greater ease of use, and supports the most advanced audio formats and highest audio quality.

Enhanced Refresh Rate

Ensures an added level of smooth and seamless motion and transitions for gaming, movies, and video. Our cable is backwards compatible and can be used with the existing installed base of HDMI devices and is perfect for your home or office use.
